PRODUCT  
DEVELOPMENT**

# D

# BEYOND FORM AND FUNCTION

There's no doubt that design and technology create innovations to make our lives better. At Engineering Product Development (EPD), we believe that whether it's the next lifestyle-changing gadget or the network behind the next big online platform, the world will never lose its appetite for product innovation.

**OUR EPD GRADUATES ARE DESIGN ENGINEERS THAT OVERCOME ANY CHALLENGE WITH AN INVENTION OR INNOVATION. THEY USE THEIR SKILLS AND KNOWLEDGE TO CONCEPTUALISE, DESIGN, IMPLEMENT AND OPERATE PRODUCTS, SERVICES AND SYSTEMS TO SOLVE ANY PROBLEM.**

Graduate with a Bachelor of Engineering in Engineering Product Development

## A DESIGN AND PROJECT-BASED CURRICULUM

Over the course of the first three common Freshmore terms, you will have built a solid foundation in Science, Mathematics and Technology (SMT), Humanities, Arts and Social Sciences (HASS) and Design, which will prepare you for your EPD major.

In the EPD programme, you are given ample opportunities to engage in active hands-on learning and solve challenges faced by industry partners, through projects set by faculty and also come up with your own products to address gaps in the market. In addition to your EPD subjects, you will

continue to take courses in HASS that will prepare you to be a new type of design engineer who embraces the cultural and social context of technology in the modern world.

Every undergraduate will have worked on at least 20 design projects throughout their years of study at SUTD. These experiences culminate in a two-term Capstone project in your graduating year. This allows you to work in teams with students from other majors and apply the skills you have mastered in EPD on either a client-sponsored industry-based project or your own entrepreneurial project to solve a real-world challenge. Upon graduation, you'll possess an extensive portfolio of industry-inspired projects, well-prepared for your career journey.

TRAILBLAZING A BETTER WORLD BY DESIGN.

## EPD CORE SUBJECTS

- Circuits & Electronics
- Computational & Data-Driven Engineering
- Engineering Design Innovation
- Fluid Mechanics/ Electromagnetics & App
- Structures & Materials
- Systems & Control

+++

**Tong Hui Xiang**  
Graduate Design Engineer,  
Dyson  
Class of 2022, EPD Alumnus

EPD has equipped me with essential technical and soft skills, enabling me to solve complex real-world problems in a controlled and safe environment. The many **hands-on projects provided me with the experience of interacting with different stakeholders, understanding their interests, and finally, coming up with the best solution.** Additionally, EPD also allows for the mix and match of modules to cater to my interests in different engineering domains and yet cater to industry demands.

## LEARNING OUTCOMES OF EPD CORE

### INTERDISCIPLINARY EXPERTISE

Master a combination of technology and design skills. Be well-gearred in the full value chain of engineering product development that cuts across traditional disciplinary boundaries.

### ADVANCING TECH OUT OF THE LAB

Extensive exposure to the translational process needed to advance technology out of the lab to create new product-solutions that live in the real world.

### PROJECT MANAGEMENT

Gain exposure to different industries and disciplines, learn and practise project management including leading a team, budget management and presentation of your ideas.

## MINOR PROGRAMMES

Our range of minors offers you more choices and flexibility in pursuing your broader interests.

- Minor in Analytics\*
- Minor in Artificial Intelligence (AI)
- Minor in Computer Science (CS)
- Minor in Design Innovation, Ventures and Entrepreneurship (DIVE)
- Minor in Design, Technology and Society (DTS)
- Minor in Digital Humanities (DH)
- Minor in Engineering Systems (ES)^
- Minor in Healthcare Informatics (HI)
- Minor in Sustainability by Design (SD)

\*For students enrolled from AY2022 onwards.

^For students enrolled before AY2022.

Students will indicate their choice of minor before the start of Term 4.

Information is subject to change. Visit [sutd.edu.sg/minors](http://sutd.edu.sg/minors) for latest updates.

**Leong Hei Kern**  
 Engineer, EMA Singapore  
 Class of 2019, Valedictorian,  
 EPD Alumnus

I chose SUTD mainly because of its **interdisciplinary and project-based approach**. Theoretical teaching is often accompanied by projects that require you to apply your learning from class to something that must work in real life. I enjoyed this because it provided direct and unbiased feedback on whether I understood a concept. The curriculum has also taught me how to **scope a problem, deconstruct it into smaller manageable parts, and chart a path towards a possible solution**. I learnt how to look at the practical points of implementation, how and when to pivot projects since things always turn out different from first conceptualisation.

**Carol Goh**  
 Deputy Chair,  
 Meiban Corporation Pte Ltd

Meiban is a full turnkey contract manufacturer for global brand owners. We need engineers who have innovative thinking, passion for excellence and giving value-added engineering. SUTD's engineering students have the **adaptive engineering mindset that makes them versatile in various problem-solving skillsets**. In addition, they are also **strong in communication and presentation skills**. We believe they will fit well into our engineering precision industry and smart digital factory.

**Chandran Nair**  
 CEO,  
 AEM Holdings

I have had the fortune to work closely with SUTD students since the first graduating batch of 2015. SUTD students, both during their internships and their employment, show a remarkable curiosity and willingness to innovate. **Resilience and practical approach to solve problems, together with their ability to self-learn and research topics** that may be new to them are attributes that make it enjoyable to have them on my teams.

# FUTURE POSSIBILITIES

## CAREERS

EPD graduates are prepared for a wide range of engineering, design and management careers. Your skills and capabilities for leading the development of new products, systems, processes or methodologies prepare you for both the private and public sectors, including healthcare, consumer electronics, robotics, future transportation, semiconductors, information communication technology, IoT, aerospace, defence, and energy and power.

### EXAMPLES OF EPD GRADUATES' JOB TITLES:

- Design engineer
- Management consultant
- Product engineer
- Project engineer
- Project manager
- Research engineer
- Technical consultant

### EXAMPLES OF EPD GRADUATES' EMPLOYERS:

- 3M
- AMD
- Apple
- DSO National Laboratories
- Dyson
- GE Aerospace
- IBM
- Lionsbot
- National Instruments
- NVIDIA
- Rolls-Royce
- Vivo Surgical

TRAILBLAZING A BETTER WORLD BY DESIGN.

## ENTREPRENEURSHIP

Adept at working on cross-discipline projects and bringing tech out of the lab into the real world, an EPD graduate is well-prepared to initiate start-up ventures.

### START-UPS BY EPD GRADUATES:

- **(these)abilities** designs inclusive products to 'Disable Disabilities' such as Keyguard 2.0 which makes any keyboard accessible. (these)abilities has worked with Grab to simplify the ride-hailing process for hearing and visually impaired users and also helped Japan's Nippon Closures explore inclusive bottle packaging designs for the 2020 Tokyo Paralympics.
- **Lord of the Chords** is a card game that sprung from the difficulties of learning music theory. Initially launched on Kickstarter, Lord of the Chords reached their goal of \$15,000 in just 75 minutes. At the end of the campaign, they raised a total of \$313,494, with over 4,000 backers from around the world.

## GRADUATE SCHOOL

The rigorous technical training from EPD will also prepare you for various post-graduate programmes. Our EPD graduates are enrolled at top universities including:

- Cornell University
- ETH Zürich
- Imperial College London
- Massachusetts Institute of Technology
- University of California, Berkeley

PREPARE TO  
TAKE ON  
THE WORLD

## MECHANICAL ENGINEERING

Be equipped with mechanical concepts, thermal fluid systems, materials science, principles of design and control, and apply them to creative solutions for modern mechanical systems.

## ELECTRICAL ENGINEERING

The study, application and product design of electrical, digital, and electromagnetism in the field of analogue and digital electronics, power engineering, communication systems, control systems, signal processing, and wireless technology.

## COMPUTER ENGINEERING

Apply mathematical and scientific principles to the analysis, design, configuration and operation of computer-related systems.

# 7 SPECIALISATIONS

**HAVE THE FLEXIBILITY TO CUSTOMISE YOUR CURRICULUM WITH ONE OR MORE SPECIALISATIONS\*. YOUR SPECIALISATION WILL BE REFLECTED ON YOUR TRANSCRIPT SO THAT EMPLOYERS RECOGNISE YOUR ADDITIONAL EXPERTISE. FIND OUT MORE AT [EPD.SUTD.EDU.SG/SPECIALISATIONS](http://EPD.SUTD.EDU.SG/SPECIALISATIONS)**

\*Specialisations offered in a given year are subject to change. Choosing a specialisation is optional.

## HEALTHCARE ENGINEERING DESIGN

Apply the design concepts and principles of engineering to healthcare products and applications.

## SELF-DIRECTED SPECIALISATION

Option to design a personalised study plan that will arm you with the necessary knowledge (e.g., Alternative Energy Systems, Materials Science) and skills to pursue unique or non-traditional careers centred around your personal interests.

## BEYOND INDUSTRY 4.0

Combines traditional manufacturing processes and technology to improve automation, communication and use of real-time data. It merges transformational innovations of the manufacturing sectors – from advanced robotics to Industrial Internet of Things – to enable a new, powerful way of organising global operations.

## ROBOTICS

Gain knowledge of robotics fundamentals, skills in the modelling, design and development of robotic platforms, insights into their theoretical essentials and the expertise to apply these methods to real-world problems.
